1. Comments

The Public Discussion Document to address solid waste management for the Wairarapa was considered by the Rural Services and Wairarapa Committee of the Regional Council at its meeting on 27 August 1999.

The Regional Council supports the ongoing work of WMW to develop an effective waste management strategy for the Wairarapa, and the eventual implementation/development of the desired solid waste disposal option/s. With respect to options proposed in the Discussion Document, the Regional Council generally supports the development of a **single regional landfill** for the Wairarapa, combined with **waste minimisation options** such as those advocated through “Zero Waste”.
