

**Recommendations of the
Hutt River Floodplain Management Advisory Committee, 29 June 2000**

Resolved to Recommend

(Chairperson/Cr Baird)

- (2) That the Landcare Committee:
- (a) adopts the proposed non-structural principles for inclusion in the Hutt River Floodplain Management Plan. The principles will provide the framework for non-structural measures to be implemented from July 2001.
 - (b) requests that the Hutt and Upper Hutt City Councils give consideration of the no-structural principles for inclusion in the Floodplain Management Plan and their District Plans.
 - (c) notes that the Non-structural Options Working Group requires the flexibility to recommend modifying the principles and outcomes, as further non-structural measures detail is developed during Hutt River Floodplain Management Plan drafting.
