

Attachment 2 Status of Surface Water Takes – October 2009

Wairarapa catchments

Catchment	Core allocation in RFP allocated	Allocation Status
Upper Ruamahanga River	100%	
Lower Ruamahanga River	100%	
Kopuaranga	100%	
Waipoua River	100%	
Waingawa River	100%	
Mangatarere Stream	100%	
Waiohine River	98%	
Tauherenikau River	52%	

Kapiti catchments

Catchment	Core allocation in RFP allocated	Allocation Status
Waitohu Stream	55%	
Otaki River	3%	
Mangaone Stream	96%	
Waikanae River	100% ¹	

Hutt catchments

Catchment	Core allocation in RFP allocated	Allocation Status
Hutt River (at Birchville)	55%	
Wainuiomata River (at Leonard Wood Park)	51%	

Red = Fully or over allocated

Orange = Stressed aquifer (i.e. over 80% allocated)

Other catchments not listed in Regional Freshwater Plan with allocation limits that are considered either fully allocated or stressed:

Wairarapa catchments - Taueru River, Makahakaha Stream, Parkvale Stream, Booths Creek, Papawai Stream, Otakura Stream, Dock Creek, Lake Wairarapa

Kapiti catchments – Waimanu Stream (Rahui Stream)

¹ In the Regional Freshwater Plan (RFP) two options are given for the Waikanae River's core allocation. The first option reflected the approach to allocation at the time the RFP was being prepared, and the second option is for an alternative allocation regime that has now been put in place through current resource consents. In the future it is unlikely that further allocation would be granted.
