Report 15.56

File: E/12/01/04

Moved

(Cr Kedgley/ Cr Bruce)

That the Council:

- 1. Notes that that the NZ Transport Agency has issued new Rules for Urban Buses that come into force on July 15, which stipulate that cities like Wellington must use lower emissions buses that are Euro 3 and higher.*
- 2. Notes that 45% of our diesel buses (around 200 buses) are pre-Euro 3 models, and do not comply with these new emissions standards.*
- 3. Notes that exhaust from diesel buses emits greenhouse gases that contribute to climate change and air pollution, and particulates that are carcinogenic, and pose a health risk to Wellingtonians.*
- 4. Notes that the Council has committed itself, in its draft Climate Change strategy, to reducing greenhouse gas emissions across all areas of influence; to promoting and providing low emission transport and to investigating the use of low carbon fuel sources for passenger transport.*
- 5. Notes that when the Regional Council discontinues trolley buses in 2017, there will be a significant increase in diesel emissions from the Wellington bus fleet.*
- 6. Notes that more recent, post Euro 3 diesel buses bring benefits in terms of fuel efficiency, reliability and maintenance, as well as reduced pollution.*
- 7. Agrees that the Regional Council's draft 2015/16 Annual Plan should include a proposal that:*

- a) *Greater Wellington Regional Council adopt a target of phasing out all pre-Euro 3 buses within the next three years, and request officers to work with bus operators to achieve this target*
- b) *Emissions targets should be included in the new Regional Council contract with bus operators, and this should include a target that new buses should be Euro 6 or higher*
- c) *Bus operators may use alternative technologies such as filters or emulsified fuels, which reduce the polluting emissions of diesel buses and allow emission standards to be met in lower rated buses, while transitioning to the new Euro 3 and higher standard*
- d) *Bus operators in the Wellington region should remove any bus that is older than 20 years of age from the school bus fleet by 2017, and only use buses that are Euro 3 or higher when transporting children to and from school.*

Moved as an amendment (to replace parts 1, 2, 5, 6 and 7 of the motion)(Cr Swain/ Cr Brash)

- 1.a *Notes that, as of December 2014, the NZ Transport Agency's Requirements for Urban Buses place an expectation that new PTOM contracts stipulate that, as a minimum, Euro 3 buses are to be used in Wellington and at least Euro 2 buses be used in the other urban centres.*
- 1.b *Notes that the Requirements for Urban Buses allows for a transition plan to be agreed between the regional council and operators so that pre-Euro 3 buses can be phased out as soon as practicable after the start of any new PTOM contract.*
- 1.c *Notes that the new PTOM contracts are intended to rolled out across the Wellington region from mid-2017.*
- 1.d *Requests that the transition plan for the introduction of diesel-electric hybrid vehicles requested by Council on 26 June 2014 be expanded to include:*
 - *the phasing out of pre-Euro 3 buses commencing mid-2017*
 - *the phasing out of buses older than 20 years commencing mid-2017*
 - *the requirement that any new buses purchased under the new PTOM contracts be Euro 6 or higher.*
2. *Notes that 45% of region's bus fleet reported to the Council by bus operators are pre-Euro 3 models.*
5. *Notes that the latest advice based on modelling emissions from the new fleet profile and network to be introduced from mid-2017 indicates a decrease in emissions as a result of the removal of older vehicles from the bus fleet and lower network vehicle kilometres.*

6. *Notes that post Euro 3 diesel buses bring benefits in terms of fuel efficiency, reliability and maintenance, as well as reduced emissions*
- 7 *Notes bus operators are able to use alternative technologies such as filters or emulsified fuels, which reduce the emissions of diesel buses.*
