

# HIGHLIGHTS FROM THE FIRST QUARTER OF 2016/17

## SUMMARY

### FIRST QUARTER 2016/17

1 July – 30 September 2016

#### Introduction

This executive summary report for the first quarter of 2016/17 provides the following:

- A summary of key performance highlights across the council<sup>1</sup>
- A financial report for the quarter
- An overview of Health & Safety
- A project dashboard, illustrating the status of significant projects for the council.

<sup>1</sup> Note: Council Controlled Organisation performance is separately reported.

# Overview | Highlights

## More people travel by public transport, walking and cycling

### *Results contributing to transport outcomes for the region included:*

Total public transport patronage increased 4.1% on the same period in 2015/16.

Bus services Request for Tenders released to the market.

Transdev successfully commenced the first Public Transport Operating Model (PTOM) contract for Wellington, delivering improved customer service and service punctuality.

The last Matangi 2 train entered service.

Driver simulator for Matangi approved and Request for Tender issued.

Trentham Rail Park & Ride carpark extension opened, providing an additional 34 spaces.

Design planning completed for bus services reliability and capacity improvements in Wellington (Khandallah to South Coast and Karori services).

Sites investigated and confirmed for renewals of bus shelters across the region.

Total Mobility procurement strategy approved by Council.

Recommendations to improve the performance of Kapiti bus services approved by Council.

Bikes on Buses testing completed. A public trial is due to commence in October.

## Our environment is clean, healthy, diverse and enjoyed by our community

### *Results contributing to environmental outcomes for the region included:*

Review of Wellington Interchange customer experience completed and the recommendations are being implemented.

Big lift in customer satisfaction shown in the annual customer satisfaction survey.

Metlink.org.nz website won a prestigious Outstanding Web Design award from Web Marketing Association.

Scope for public transport fare review endorsed by Council and process underway, including establishment of a Reference Group.

Variation to the Regional Public Transport Plan endorsed enabling the trial of a cross-boundary bus service between Levin and Waikanae.

National Ticketing Programme roadmap agreed and business case development commenced.

'Resolve' complaints system adopted for rail customers.

Significant progress made on the Let's Get Wellington Moving programme.

Successful Project Glow Wear competition held. Voting for the People's Choice Award resulted in nearly 8,000 Facebook 'reactions' with a total reach of 15,000. Good media coverage resulted.

Council adopted an amendment to the Parks Network Plan relating to camping policy and motorised recreation tracks in the Akatarawa Forest.

Three-year temporary licence granted to Wellington Riding for the Disabled to operate their activities and graze horses at Battle Hill Farm Forest Park.

5,900ha of initial control and 10,000ha of maintenance possum control completed in the Regional Predator Control Programme

An Integrated Catchment Management Agreement for the Otaki River catchment was signed with Ngā Hapū o Ōtaki. Staff involved in the inspection of rural properties as part of the MPI led Wairarapa pea weevil incursion response

Winter land management works programme has been completed with approximately 24,000 poles planted between June and September and over 37ha of land permanently retired in July and August.

Five new proposals received for QEII covenant support. The funds contributed by GWRC will go toward fencing and pest control on 22.79ha of wetland, swamp forest, lakes and forest blocks, which will be legally protected in perpetuity through the QEII National Trust.

adopted by Council.

## Our communities are increasingly resilient to flood risk & other natural hazards

### *Results contributing to community resilience included:*

WREMO participated in the national Tsunami Exercise, Tangaroa, conducted on 31 August and 1 September. The scale of the exercise provided staff a greater sense of confidence in being able to manage an event of this nature.

WREMO received the 2016 IAEM-Oceania Public Awareness Award, Division 2 (regional/non-profit) for the development and presentation of a series of Organisational Resilience Symposia for small businesses, school and aged care facilities. These three groups are recognised as some of the most vulnerable to disaster.

Jim Cooke Park stop bank consent granted.

Pinehaven flood management plan (FMP)  
Implementation MOU signed with Upper Hutt City Council.

Phase 1 of the Hutt River Environmental Strategy review completed, and the second and final phase is underway.

Finalised process for publicising and consulting on the draft Wellington Region Natural Hazards Management Strategy.

## Strong leadership and collaboration supports robust regional growth

### *Results contributing to regional growth included:*

Continued workshops with core utilities (water, electricity, transport) to develop a coordinated regional approach to improving resilience. A scope for the Programme Business Case was developed; the Investment Logic Mapping process was completed; and a draft Strategic Case developed.

The Regional Transport Resilience Programme Business Case developed a draft prioritised list of regional locations that are vulnerable to resiliency risks.

Report on cyber security skills included recommendations to government and business on addressing the pressing demand from the cyber security sector for specialist skills.

Consortia established to develop a national design strategy. It will include regional components for Wellington and Auckland. The WRS Office is separately working with Massey University and WREDA on a regional project to profile and grow the design industry in Wellington.

Discussions held with WREDA on improving coordination and collaboration between WREDA programmes and the WRS Office, and a draft agreement has been prepared.

Co-ordinated a number of key events for Drive Electric week.

GWRC's corporate greenhouse gas emissions inventory for the 2015/2016 year completed.

Opportunities for the 'Spark-plug Initiative' identified and agreed with city and district councils in the region. Published a paper setting out how GWRC assessed the viability of electric vehicles for its corporate fleet that will be applicable to vehicle fleet managers across the sector.

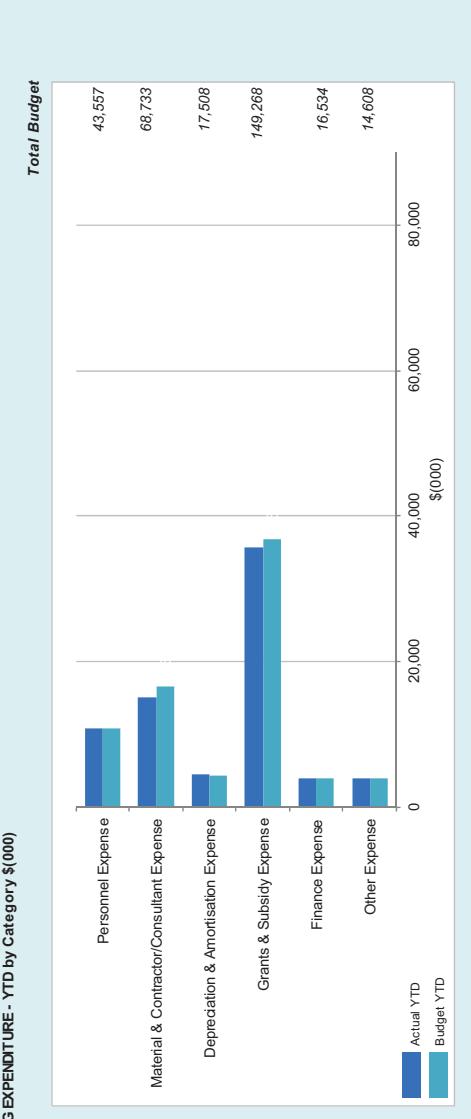

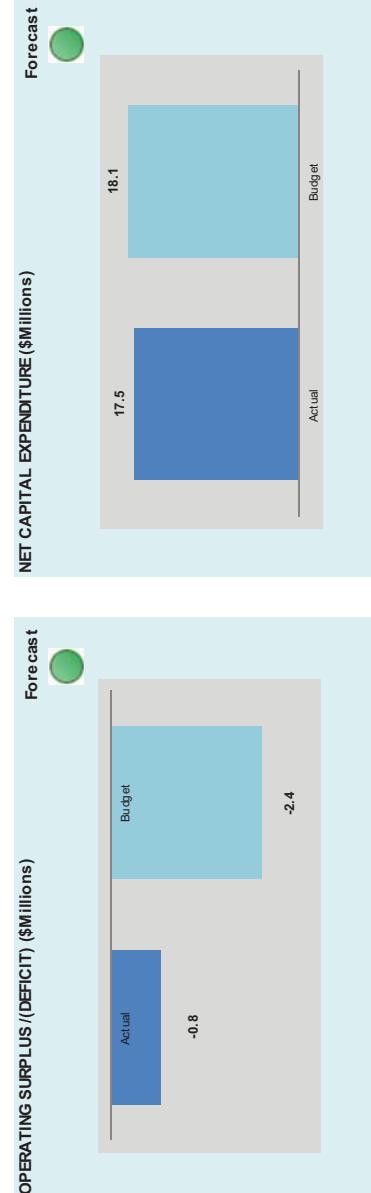

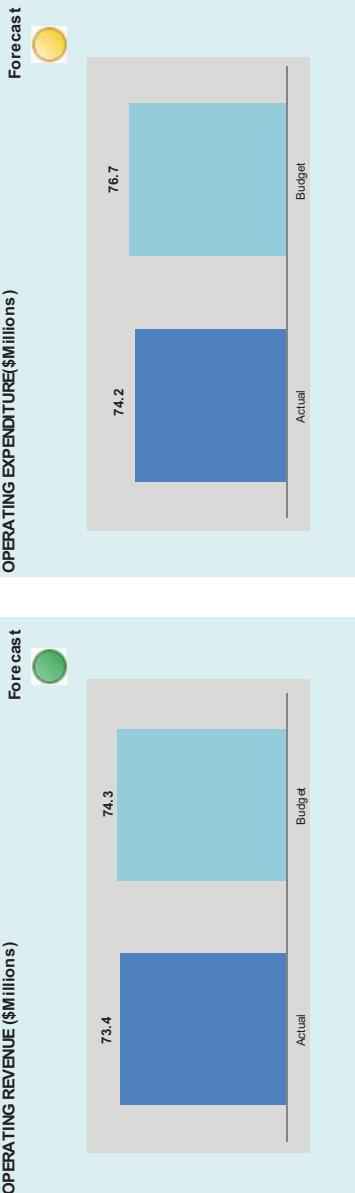

Māori Partnership Framework signed off by ELT. An important milestone achieved in the development of the Heritage Precinct at Queen Elizabeth Park with a blessing of the entranceway.

Ara Matua training: In total, 21% of staff have completed the requirements of the Pakiaka and Tiwai te reo and tikanga training. This exceeds the Long Term Plan training target of 13 percent.

## Key Highlights

- Operating Revenue: \$0.9m Unfavourable**  
Finance revenue is \$0.1m unfavourable to budget, largely reflecting no subvention payment (tax loss) of \$0.5m from Centre Port, partially offset by greater interest earned from investing from the prefunding of some debt.
- Other revenue** is \$0.7m favourable to budget, largely due to additional Catchment revenue from income share on Hutt River Car Park fees from prior years \$0.4m, greater than planned rail fare revenue of \$0.3m favourable to budget from higher patronage. This was offset by \$0.3m lower Akura mostly internal sales of poles and seedlings due to the extended dry winter conditions and lower dairy returns.
- Grants and subsidy revenue** is \$1.6m unfavourable to budget as a consequential result of lower PT operating costs which NZTA subsidies are based on. This was due to the timing of project spend.
- Operating Expenditure \$2.5m Favourable**  
**Materials and Contractors expenditure** is \$1.4m favourable to budget primarily due to:  
Public Transport expenditure is \$1.7m below budget primarily due to timing of PT Transformation programme.  
Catchment is \$0.8m below budget largely reflecting lower land management activity, and slower than planned delivery of flood protection maintenance and biodiversity programmes.  
Partially offsetting this are higher Water Supply contractor costs \$0.2m, offset by savings in grants and subsidies expenditure. Corporate Services is \$0.4m higher than budget largely due to timing of expenditure.
- Grants and Subsidy expense** is \$1.2m favourable to budget primarily due to lower diesel bus inflation (\$0.2m), lower bus operator costs (\$0.3m) and lower rail costs (\$0.3m). Water Supply is \$0.4m favourable as expenditure was incurred as material and contractors instead.
- Depreciation and amortisation** is \$0.1m unfavourable to budget, largely due to higher than planned depreciation for Water and Strategy as a consequence of increased asset capitalisations late last year.
- Capital Expenditure \$0.6m Favourable**  
Catchment is \$0.6m favourable to budget due to timing of Riverlink property purchases.
- Corporate Services** is \$0.5m favourable to budget, reflecting later than planned expenditure on ERP upgrade and core IT capex.
- Public Transport** is \$0.3m unfavourable to budget, reflecting timing difference of expenditure. \$1.3m higher Matangi train capex due to timing of payments, and \$0.6m lower park n ride expenditure due to delays to Waikanae & Upper Hutt carparks due to asbestos find.
- Environment** is \$0.3m unfavourable to budget, as planned works for QEP Park were brought forward due to favourable weather.

# Overview | Health and Safety Indicators

## Highlights and improvements

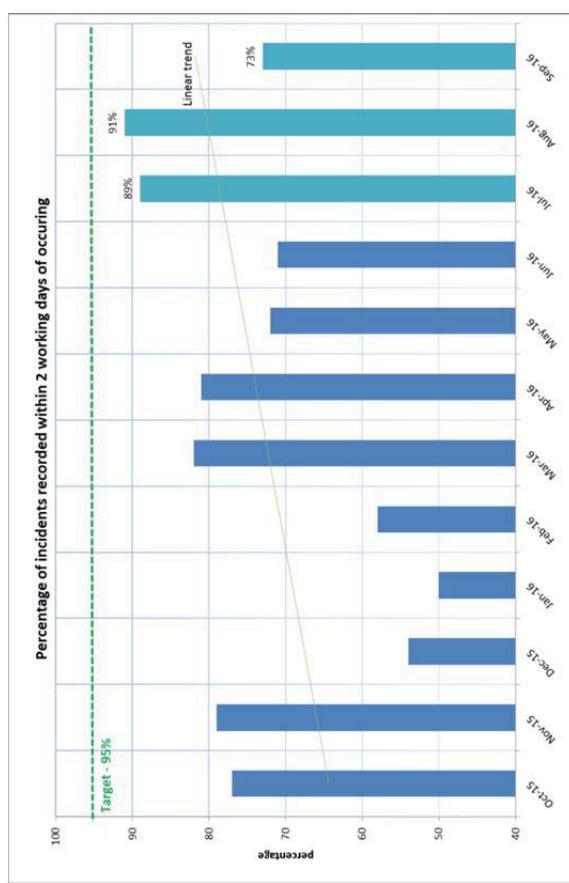

- ✓ Executive Leadership Team began their scheduled health and safety field visits. These visits are focused on showing due diligence in health and safety by understanding the challenges faced by our people in their everyday work tasks, especially those teams that work in challenging conditions.
- ✓ Our new PCBUs (Person Controlling a Business or Undertaking) Policy has been approved by ELT. This policy recognises the new concept of a PCBUs in the Health and Safety at Work Act 2015 and supports our people in managing their relationships with PCBUs.

## Reporting of health and safety incidents

The graph below shows an improving trend this quarter in our reporting of incidents within 2 days, however we remain below our target of 95%. There was a positive move towards our target in July and August, but a dip in September. This shows us that the target is achievable when we work with our teams to emphasise the importance of timely reporting into KESAW. We need to continue our engagement on this and as such will look at our methods for communicating this requirement to our teams.

## Key Performance Indicators

The number of days lost due to injuries this quarter is below target with a year to date figure of 3.5 days lost per 100,000 hours worked. This equates to 4 lost time injuries and 8 lost days, the same quarter last year we recorded 3 lost time injuries but 25 lost days<sup>1</sup>. Indicatively we can say that we see slightly more lost time injuries this quarter but these resulted in less lost time than the equivalent quarter last year where we had less, but more severe injuries. Our ratio of events to actions is stationary at 0.2 compared to the same quarter last year. The KESAW dashboard will be operationally launched early next year and this will support our teams in improving this ratio by making actions more visible.

Indicator	Year to date total	Status
1. Percentage of incidents reported within 2 working days	<b>95%</b>	<span style="color: red;">84%</span>
2. Ratio of the number of events to the number of subsequent actions	<b>0.4</b>	<span style="color: red;">0.2</span>
3. Days lost due to injuries, per 100,000hrs worked	<b>7.5</b>	<span style="color: green;">3.5</span>

<sup>1</sup> It should be noted that lag factors should be considered in these figures due to the processing of ACC payment sin Payroll

# Overview | Major Projects Indicators

## Overall comment:

- Two new major projects have been added this quarter. They are:
- Core Systems Refresh which is the replacement of the existing separate financial and asset management systems with one consolidated platform and other complimentary business features.
  - Let's Get Wellington Moving/Ngauranga to Airport is a joint initiative along with Wellington City Council and NZTA.

Major projects performance against KPIs continue to steadily improve. All projects reported in the previous Q4 period are now showing a green – “On Track” rating and the new projects are also tracking favourably.

During the quarter, risk management reviews and lessons learned workshops were facilitated by the PMO which will be an ongoing activity supporting all areas but with a particular focus on major and high priority projects.

Audit NZ undertook a review of the project governance arrangements for a number of the major projects and commented “*We found a good level of governance and accountability... There are no matters to bring to your attention*”.

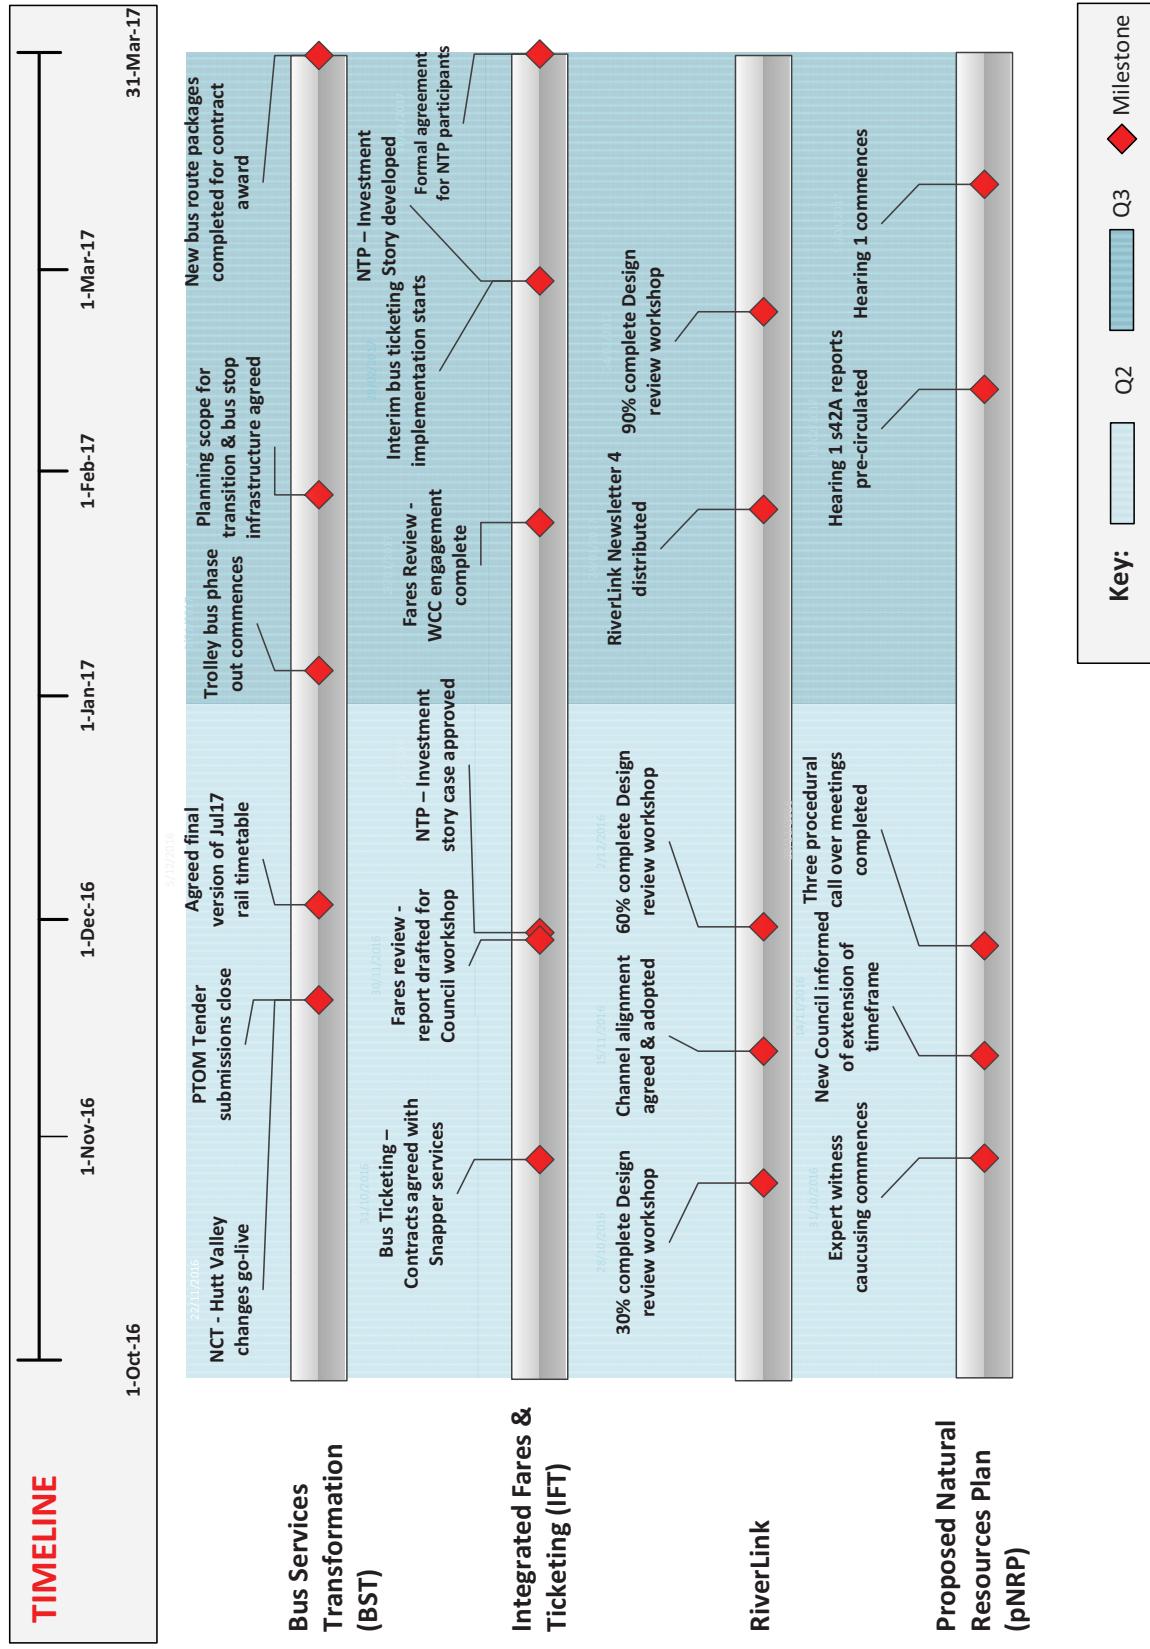

Key:	On track	Some issues and risks but being managed	Significant issues, off-track
------	----------	---	-------------------------------

Significant Project or Programme	Overall Status	Timing	Budget	Issues	Risks	Comment
Bus Services Transformation (BST) <i>PTOM – Bus contracting; Bus fleet; Network, Customer and Transition</i>						Good progress made, highlighted by the release of the PTOM bus RFT in August and agreement with NZ Bus on the transition arrangements for exiting the trolleys. Additional media work to manage community concerns resulting and active campaigns by stakeholders, particularly in relation to the new network changes. Communications and marketing work related to the network changes, planned for 2017, were brought forward.

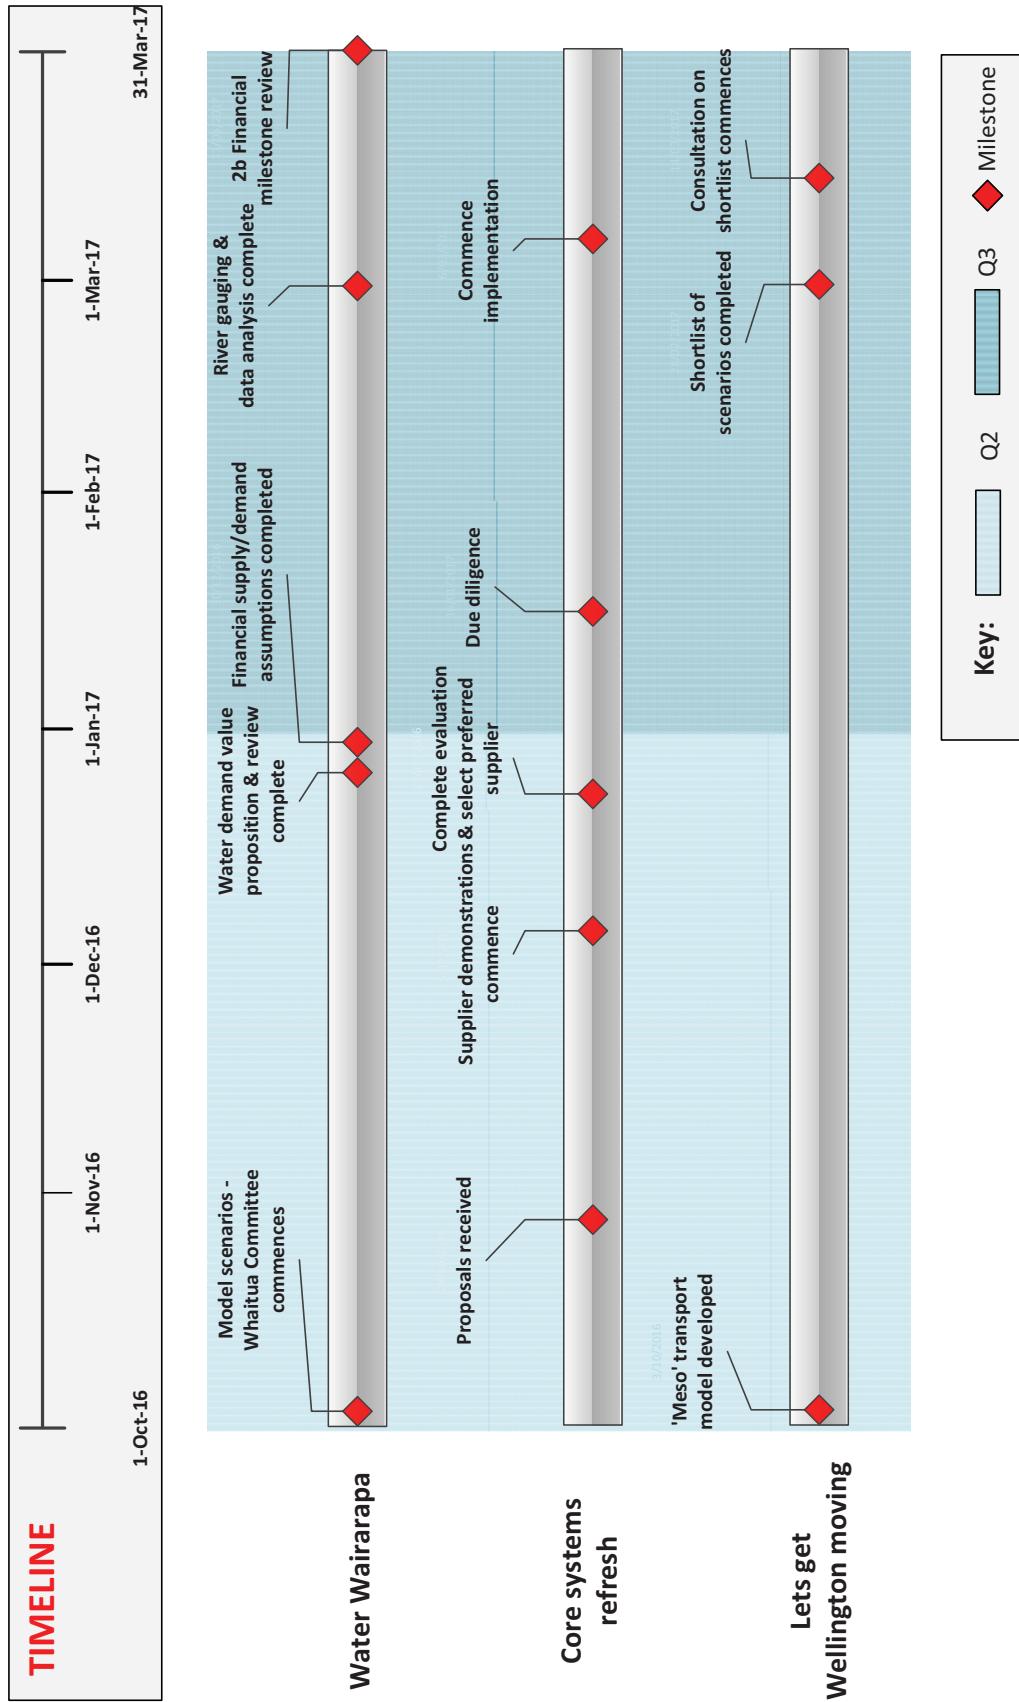

Significant Project or Programme	Overall Status	Timing	Budget	Issues	Risks	Comment
<b>Integrated Fares and Ticketing (IFT)</b> <i>National Ticketing Programme; Interim Bus Ticketing Solution; GW Ticketing Operations; Fares Transition</i>						Interim Bus Ticketing Solution has progressed well through contracting processes with Snapper. This included a series of workshops to develop and agree requirements, roles and responsibilities and operations functions. A series of presentations within GW set out and gained acceptance for the requirements needed at GW in respect of Ticketing Operations. As a result, a Ticketing Operations Establishment project has been initiated. Pricing remains within estimated budgets and contracts are expected to be finalised by the end of October 2016.
						The National Ticketing Programme (NTP) is a co-operative approach for the specification, procurement, delivery and operation of a fully integrated ticketing solution which will be deployed by GW and other local authorities and will be the path to deliver the full IFT for GW. The NTP Strategy and Planning team has developed a multi-stage approach to the procurement, which includes development of the indicative business case which GW is leading and is expected to be delivered and approved by May 2017. A funding model has been agreed in principle and formal agreement between participating authorities will be required by March 2017.
<b>RiverLink</b> <i>(was Hutt River City Centre Upgrade Project)</i>						NZTA/GWRC/HCC have completed a range of community engagement activities including SH2 Customer Insight Survey and RiverLink Community Design Workshops (263 attendees). Preliminary design 30% milestone was met on 28 October 2016. The 30% milestone will confirm design of river channel form, river berm area and stopbank heights and footprint. Property acquisition continues to progress while the amendments to the RLIMA wait completion of its reading in Parliament. GWRC and HCC are preparing for new councillor briefing workshops in November/December to provide project overview. HCC are seeking to identify opportunities to incentivise Making Places with Daly Street property owners. GWRC looking at methods for how the two councils can work together to achieve Making Places outcomes. NZTA Melling Intersection Improvements options listing process is on track to meet its December milestone.
<b>Proposed Natural Resources Plan (pNRP)</b>						The second phase of pre-hearing meetings continues. First drafts of s42A reports for Hearing 1 have been completed. The project timeframe for the hearing panel to issue its decisions has been revised and formal approval granted on 21 October 2016. The new end date is 31 July 2018 which aligns with progress to date as opposed to the 2 year statutory timeframe set out in the RMA (31 July 2017). The Ministry for the Environment has been formally notified that we will not be meeting the 2 year statutory timeframe and officials have confirmed we have appropriate justification for extending this timeframe. The new Council will be informed of this extension of timeframe in November 2016.

Significant Project or Programme	Overall Status	Timing	Budget	Issues	Risks	Comment
Water Wairarapa						This quarter has seen a change in impetus moving from technical investigations, with a recent emphasis on engineering and detailed information gathering, to a focus on commercial viability, farmer demand and council partnerships. The cornerstone funding partner has transferred from MPI (IAF) to Crown Irrigation Investments Ltd (CILL). CILL has modified the long term funding cycle to short term stage-by-stage and altered what was essentially a 50/50 cost share to a more restricted regime - the most significant being a cap on staff resourcing costs. A significant milestone was the financial commitment by the three Wairarapa Councils towards socio-economic impacts. BERL has made significant progress on the regional economics modelling. Climate change has been identified as a potential major influence on Wairarapa's climate and especially its future water needs. The major emphasis continues with the ongoing engagement with CILL in agreeing inputs into the project's commercial viability.
Core Systems Refresh						The Business Case was endorsed by ELT early August 2016. Since then, the project team has been actively developing detailed requirements to be issued to suppliers as part of the Request for Proposal (RFP). The RFP was reviewed by legal and probity advisors prior to being issued. The RFP was issued on 22 September 2016 with supplier briefings held early October 2016. Proposals were received late October.
						An evaluation team from across the organisation has been formed to evaluate various aspects of supplier proposals given the large breadth of functionality being sought. Preparation for the evaluation of supplier proposals is underway. A probity advisor has been engaged during the evaluation process and is participating in some evaluation briefings and moderation sessions.
Let's Get Wellington Moving						Highlights of the first quarter of 2016/17 include: Guiding urban design and transport principles agreed and communicated; Public engagement event held focusing on assessment criteria; Bus Rapid Transit and Travel Demand Management options work commissioned and underway; Interventions and options workshop held and long list scenario development underway. There was also a change in management during this quarter, with programme director Jim Bentley leaving in August 2016 to take up another opportunity, and Barry Mein taking on the role in mid-September 2016.
