

Stormwater Controls

Key: Activity Status

Rule

***HC** (Hydrological Control): The proposal provides hydrological control where discharges will enter a river

Which environment is the stormwater discharging from?

From new state highway

Is there a discharge of stormwater into water or into or onto land from the creation of new impervious surfaces where it may enter a surface water body or coastal water?

Yes

P.R9/WH.R10 - Stormwater from new state highways

Does the discharge meet the conditions?

Yes

Discretionary Activity

No

From port or airport

Is there a discharge of stormwater into water and/or onto land where it may enter a surface water body or coastal water, including through an existing or new local authority stormwater network?

No

P.R2/WH.R2 - Stormwater to land

Does the discharge meet the conditions?

Yes

Permitted Activity

Yes

WH.R8 - Stormwater from a port or airport

Is the target attribute state for copper and zinc in Table 8.4 met for the relevant part FMU or the coastal water objective for copper and zinc in Table 8.1 met in the relevant coastal water management unit?

No

P.R11/WH.R12 - All other stormwater discharges

Non-Complying Activity

Yes

Restricted Discretionary Activity *HC

From a local authority or state highway stormwater network

P.R8/WH.R9 - Stormwater from a local authority or state highway network

Does the resource consent application include a stormwater management strategy prepared in accordance with Schedule 31 to progressively improve discharge quality, including a reduction of copper and zinc commensurate with what is required in the receiving environment to meet the target attribute state in Table 8.4 or coastal objective in Table 8.1 for the relevant part FMU or CWMU?

Yes

Restricted Discretionary Activity *HC

No

No - the stormwater discharge is an existing discharge

Is there a discharge of stormwater through a local authority stormwater network?

Yes

Existing discharges of stormwater into a local authority stormwater network will be managed under **P.R8/WH.R9** by the local authority or the relevant water authority

No

P.R3/WH.R3 - Stormwater from an existing individual property to surface water or coastal water

Does the discharge meet the conditions?

Yes

Permitted Activity

No

P.R11/WH.R12 - All other stormwater discharges

Non-complying activity

From greenfield development or property in existing urbanised areas

Is there a discharge of stormwater into water, or onto or into land where it may enter a surface water body or coastal water (excluding groundwater), including through an existing or new local authority stormwater network?

Yes

Is the stormwater from the use of land for the creation of new, or redevelopment of existing impervious surfaces?

Yes

Creation of new, or redevelopment of existing impervious areas of **less than 1,000m2**

P.R5/WH.R5 - Stormwater from new and redeveloped impervious surfaces

Does the discharge meet the conditions? ***HC**

Yes

Permitted Activity

No

Greenfield

Is the greenfield development unplanned according to Maps 88-89?

Yes

P.R12/WH.R13 - Stormwater from unplanned greenfield development

Prohibited Activity

No

P.R6/WH.R6 - Stormwater from new greenfield impervious surfaces

Does the discharge meet the conditions? ***HC**

Yes

Controlled Activity

No

Redevelopment in existing urbanised areas

P.R7/WH.R7 - Stormwater from new and redeveloped impervious surfaces of existing urbanised areas

Does the discharge meet the conditions? ***HC**

Yes

Controlled activity

No

Creation of new, or redevelopment of existing impervious areas **greater than 3,000m2**

P.R10/WH.R11 - Stormwater from new and redeveloped impervious surfaces

Does the discharge meet the conditions?

Yes

Discretionary Activity

No

No - there is a discharge of stormwater onto or into land that may enter groundwater

P.R2/WH.R2 - Stormwater to land

Does the discharge meet the conditions?

Yes

Permitted Activity

No

Is there a discharge of stormwater into water, or onto or into land where it may enter a surface water body or coastal water including through an existing local authority stormwater network?

Yes

P.R11/WH.R12 - All other stormwater discharges

Non-Complying Activity

No - discharge to land/groundwater

From high risk industrial or trade premise

Is the stormwater discharge existing (i.e. there is no creation of new, or redevelopment of existing impervious surfaces)?

No

Is there a discharge of stormwater into water, or onto or into land where it may enter a surface water body or coastal water including through an existing local authority stormwater network?

Yes

P.R4/WH.R4 - Stormwater from an existing high risk industrial or trade premise

Does the discharge meet the conditions?

No

Permitted Activity

Yes
